# Properties

## **Best Footed**

*Feet -The feet should be round and the toes short, strong, well arched and held close together. The pads are hard and deep, and the nails must be short and strong.*

## **Best Eye**

*Eyes -The eyes should be of oval shape and medium size, neither prominent nor sunken and must express alertness and intelligence. A warning or suspicious glint is characteristic when approached by strangers. Eye color, dark brown.*

| 410 | Smokin' Joe Lewis       | Ponstingle     |  |

## **Best Coated**

*Coat -The coat is smooth, a double coat with a short dense undercoat. The outer-coat is close, each hair straight, hard, and lying flat, so that it is rain-resisting. Under the body, to behind the legs, the coat is longer and forms near the thigh a mild form of breeching. On the head (including the inside of the ears), to the front of the legs and feet, the hair is short. Along the neck it is longer and thicker. A coat either too long or too short is a fault. As an average, the hairs on the body should be from 2.5 to 4 cms (approx. 1-1.5 ins) in length.*

## **Best Ear**

*Ears -The ears should be of moderate size, preferably small rather than large, broad at the base, muscular, pricked and moderately pointed neither spoon nor bat eared. The ears are set wide apart on the skull, inclining outwards, sensitive in their use and pricked when alert, the leather should be thick in texture and the inside of the ear fairly well furnished with hair.*

## Best Headed

*Head and Skull* -The head is strong and must be in balance with other proportions of the dog and in keeping with its general conformation. The broad skull is slightly curved between the ears, flattening to a slight but definite stop. The cheeks muscular, neither coarse nor prominent with the underjaw strong, deep and well developed. The foreface is broad and well filled in under the eyes, tapering gradually to form a medium length, deep, powerful muzzle with the skull and muzzle on parallel planes. The lips are tight and clean. Nose black.

## Best Tail

*Tail* -The set on of tail is moderately low, following the contours of the sloping croup and of length to reach approximately to the hock. At rest it should hang in a very slight curve. During movement or excitement the tail may be raised, but under no circumstances should any part of the tail be carried past a vertical line drawn through the root. The tail should carry a good brush.

The topline is level, back strong with ribs well sprung and carried well back not barrel ribbed. The chest is deep, muscular and moderately broad with the loins broad, strong and muscular and the flanks deep. The dog is strongly coupled.

## Best Gaited

*Gait / Movement* -The action is true, free, supple and tireless and the movement of the shoulders and forelegs is in unison with the powerful thrust of the hindquarters. The capability of quick and sudden movement is essential. Soundness is of paramount importance and stiltiness, loaded or slack shoulders, straight shoulder

*placement, weakness at elbows, pasterns or feet, straight stifles, cow or bow hocks, must be regarded as serious faults. When trotting the feet tend to come closer together at ground level as speed increases, but when the dog comes to rest he should stand four square.*
